FIENERBA MEADOW GRASS

FOR ALL HORSES

Meadow Grass Fienerba is a **high-value forage** made from a carefully selected mix of grasses and legumes. It **has long fibres and a very high nutritional value** (up to twice that of regular dry meadow hay).
It is a complete forage with balancing properties to keep a horse strong and healthy.
Unlike dry feeds, which can impair the horse's digestive function and are low in nutrients, Meadow Grass is composed of fibrous, moist forage, which is much closer to the horse's natural grass-based diet, preserving its nutritional principles.
For these many benefits, **Meadow Grass naturally improves the horse's physical condition and performance**.
Its low sugar content makes it suitable for horses that are hypersensitive to non-structural carbohydrates (starch, simple sugars, and fructans). Not all horses are able to digest and metabolise foods rich in sugars, and indeed, one in three horses may develop problems if fed such foods.
Meadow Grass is the **ideal base for the ration of horses with metabolic syndrome, equine Cushing's disease, laminitis, or chronic diarrhoea.**
When used regularly, it **protects the respiratory system** of healthy horses and keeps it efficient; in horses with respiratory disorders, it alleviates suffering and reduces or eliminates symptoms of the disease.
Meadow Grass Fienerba is also an excellent base feed for performance horses: to enhance its effect, it can be supplemented with a daily serving of Fienerba Superfit.
Meadow Grass is of consistent quality, and does **NOT** contain additives, colourings, molasses, or flavour enhancers.

Typical analysis (average values % dry matter):

Moisture	30-50
Crude Protein	10,50-12,00
Crude Fibre	30,00-32,00
Ash	7,00-9,00
Crude Fat	2,00-3,00
Carbohydrates (WSC)	<10%

Recommended daily dosage
Administer from 1.5 to 2 kg per 100 kg of the horse's body weight, depending on the type of horse and the work it is subjected to.
Introduce gradually into the diet.

COMPOSITION: Selected mixture of Grasses and Legumes

20kg bag containing 4 portions of 5kg each. Any swelling of the bag does not affect the quality of the product.

Meadow Grass is:

DUST-FREE

BETTER PERFORMANCE

BETTER RESPIRATION

HIGH NUTRITIONAL VALUE

REDUCED SUGAR CONTENT

MORE MUSCLE, LESS FAT

MORE STRENGTH, MORE ENERGY

FIENERBA
