FIENERBA SOFT MEAL

FOR HORSES WITH CHEWING DIFFICULTIES

As the years go by, some horses develop difficulties in chewing long-fibre forage, particularly dry hay, which can irritate the intestinal lining, causing inflammation, colitis, and diarrhoea. When a horse is unable to grind hay properly, it still attempts to swallow it, and the whole or coarsely broken-down food passes through the gastrointestinal tract, overloading both the small and large intestines. If the intestine is unable to cope with this workload, undigested food accumulates and causes a blockage. Some horses may become reluctant to eat hay because it is too rough and hard for them, causing pain during chewing. This often leads to weight loss and a general decline in physical condition. To counteract this, it is essential to adjust the horse's diet appropriately.

For horses with chewing difficulties, we have developed S**oft Meal, a soft feed made from a selected mix of Graminaceae and Leguminosae.**

It consists of a carefully selected blend of Grasses and Legumes with balancing properties and high nutritional value, **promoting weight gain and naturally improving the horse's physical condition**.

Soft Meal has a **low sugar content**, making it **suitable for older horses**, which are often highly sensitive to non-structural carbohydrates (starch, simple sugars, and fructans) and prone to conditions such as PPID and laminitis. It contains **NO DUST**, **helping to protect the horse's respiratory system**; in horses suffering from respiratory disorders, it alleviates discomfort and reduces or even eliminates symptoms of the disease.

Does NOT contain additives, colourants, molasses, or flavour enhancers.

Like all Fienerba Easylage products, it is packaged in 20 kg bags, divided into 4 portions.

Typical analysis (average values % dry matter):

Moisture	30-50
Crude Protein	10,50-12,00
Crude Fibre	30,00-32,00
Ash	7,00-9,00
Crude Fats	2,00-3,00
Water Soluble Carbohydrates	<10%

Recommended daily dosage
Administer 1.5 to 2kg per 100kg of the horse's body weight.
Introduce gradually into the diet.

COMPOSITION: selected mix of Graminaceae and Leguminosae

20kg bag containing 4 portions of 5kg each.
Any swelling of the bag does not affect the quality of the product.

Soft Meal is:

EASY TO CHEW AND SWALLOW
LOW SUGAR CONTENT
HIGH NUTRITIONAL VALUE
DUST-FREE
PALATABLE AND DIGESTIBLE
IDEAL FOR HORSES WITH DENTAL ISSUES
